**2020 Vision – Component 2**

Pavement management tools will allow agencies to communicate effectively with stakeholders, using clear statements that are tied to agency goals & pavement worth

---

---

---

---

---

---

---

---

10

**2020 Vision – Component 3**

Within an asset management framework, pavement management will be used for investigating decisions & program options in both private & public sectors

---

---

---

---

---

---

---

---

11

**2020 Vision – Component 4**

A pavement management analysis will consider new materials, & construction/design practices, as well as other factors that influence project & treatment selection, including safety, congestion, & sustainability

---

---

---

---

---

---

---

---

12

## Old Age Questions

- Are we using the right metrics?
- Should we be better integrating design & construction data with pavement performance data in our pavement management systems?
- Are we using the results of pavement management to drive decisions?
- Are we employing the right kinds of people & do they have the skills they need?

16

---

---

---

---

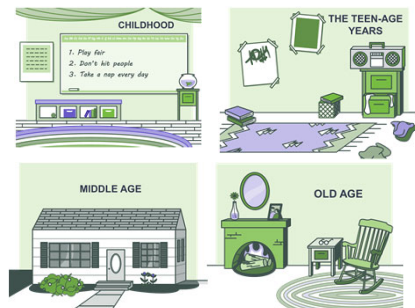

---

---

---

---

## Prospects for the Future

17

---

---

---
